

Disciplined Alpha Dividend Strategy

Portfolio and Economic Commentary – 4th Quarter 2017

DISCIPLINED ALPHA DIVIDEND STRATEGY COMMENTARY

As value investors, we constantly focus on our duty to protect the principal of our investments even as we look for ways to grow them over time as well. As economists, we remain alert to trends taking place in the larger global economy. As analysts, we seek to invest in securities priced with a margin of safety in order to account for their near term volatility and our uncertainty about what the future holds. With this in mind, we look for opportunities in three specific categories: classic value, persistent earners, and distressed or contrarian.

Classic value stocks sell at attractive valuations and provide above-average dividend yields and growth. Persistent earners are companies which have steady and predictable earnings and that are selling below their historic valuation. The distressed/contrarian category refers to stocks that are out of favor due to what we perceive to be temporary factors and are likely to appreciate substantially as the temporarily distressing factor recedes. Typically the distressed category is the smallest in the portfolio.

PERFORMANCE COMMENTARY

The Disciplined Alpha Dividend strategy gained 16.22% while the Russell 3000 Value index returned 13.19% for the year. The strategy has produced outstanding ten-year risk adjusted returns roundly besting its indices and peer group for the period earning a Morningstar 4-star 10-year rating. The trailing annualized ten year returns were 9.13% for the strategy, 7.19% for the Russell 3000 Value index and 8.84% for the Dow Jones US Select Dividend index. Since inception on January 1, 2003, the strategy has returned 9.42% versus 9.63% for the Russell 3000 Value index and 10.07% for the Dow Jones US Select Dividend index.

Our sector allocation weighting and active return have added to relative performance by just over 3% for the year against the Russell 3000 Value index. The industrials, technology and healthcare sectors have been our largest contributors to active return, while the financial services, consumer cyclical and basic materials sectors were the largest detractors to relative performance. Though maintaining a focus on dividends and above average income generation, we believe the utility and real estate sectors remain overvalued and will perform poorly in a potentially rising interest rate environment. The top performers for the year have been Caterpillar (70.3%), AbbVie (64.5%), Apple (51.0%), KKR & Co. (42.5%) and Norfolk Southern (37.4%). The bottom performers have been Mattel (-38.3%), Western Union (-30.2%), Pitney Bowes (-20.6%), New York Community Bancorp (-11.7%) and B&G Foods (-10.8%).

Sector Allocation (Morningstar)

Top Ten Holdings

Weight

Caterpillar	3.93%
AbbVie	3.82%
DineEquity	3.73%
Intel Corp	3.67%
Norfolk Southern	3.62%
Qualcomm	3.60%
Cisco Systems	3.59%
JPMorgan Chase & Co.	3.56%
Phillips 66	3.56%
Wells Fargo & Co.	3.47%

DISCIPLINED ALPHA DIVIDEND STRATEGY COMMENTARY

As one may recognize from the below chart, our firm has consistently provided a steady stream of income to our clients in the form of dividends. It is our assertion that this income stream has not only reduced the risk of our portfolio, but also provided a large part of the total return thereby leading to our performance success over this past tumultuous decade plus.

We believe that dividends allow our investors to “get paid to wait” while patiently working through volatile business and market cycles. This strategy provides emotional support during difficult cycles enabling investors to weather turbulent periods utilizing dividend income for personal needs or to reinvest cash at lower valuations. Our strategy is not only grounded in psychological and behavioral finance concepts, but is also supported by empirical evidence outperforming in both negative and full market cycles.

Dividends also act to align the interests of corporations and shareholders in helping to eliminate the agency effect. Corporate boards have recognized the value of dividends in stabilizing their stock price and encouraging investment during both high and lower tax regimes. In supporting and increasing dividends over time, managers are compelled to maintain a reliable stream of cash flows to shareholders rather than waste capital on those expenses adding little to corporate revenue including executive perks, pet projects, and ill-timed, unwise acquisitions. It appears a paradox; however, our experience and academic studies have displayed that sufficient investment for a good business can still occur in conjunction with dividends as managers are forced to invest cash flow more prudently and only in those capital investments in which they have the highest conviction in adding to corporate revenue particularly since stocks buybacks are often ill-timed.

ALTRIOUS: A STORY OF CONSISTENT DIVIDENDS OVER THE YEARS

The strategy has consistently delivered an above average dividend yield versus the S&P 500 since its inception.

DISCLOSURES

This report includes candid statements and observations regarding investment strategies, individual securities, and economic and market conditions; however, there is no guarantee that these statements, opinions or forecasts will prove to be correct. These comments may also include the expression of opinions that are speculative in nature and should not be relied on as statements of fact. Altrius is committed to communicating with our investment partners as candidly as possible because we believe our investors benefit from understanding our investment philosophy and approach. Our views and opinions include “forward-looking statements” which may or may not be accurate over the long term. Forward-looking statements can be identified by words like “believe,” “expect,” “anticipate,” or similar expressions. You should not place undue reliance on forward-looking statements, which are current as of the date of this report. We disclaim any obligation to update or alter any forward-looking statements, whether as a result of new information, future events or otherwise. While we believe we have a reasonable basis for our appraisals and we have confidence in our opinions, actual results may differ materially from those we anticipate.
